

The listing of the claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-3: Canceled.

Claim 4: (New) A snow glider comprising:

a front tray having a front recess;

rear tray having a rear recess with approximately the same shape as the front recess;

a center part connecting the two trays to each other;

wherein two snow gliders can be linked together by placing the rear recess of a first snow glider in the front recess of a second snow glider or placing the front recess of the second snow glider in the rear recess of the first snow glider.

Claim 5 (New): A snow glider according to Claim 4, wherein the front and rear recesses are each circular, so that when the recesses of different gliders engage each other the recesses allow the snow gliders to swivel with respect to each other and weave as the gliders move.

Claim 6 (New): A snow glider according to claim 4, further comprising grip plates mounted on both sides of the rear tray.

Claim 7 (New): A modular unit comprising at least two snow gliders according to claim 4, wherein the snow gliders are connected to each other by positioning the rear recess of a first snow glider in the front recess of a second snow glider or positioning the front recess of the second snow glider in the rear recess of the first snow glider.

Claim 8 (New): A modular unit in according to claim 7, wherein the engaged recesses of the snow gliders form an articulation to allow the two trays containing the engaged recesses to swivel with respect to each other.

Claim 9 (New): A modular unit according to least one front snow glider according to claim 7, further comprising grip plates on the rear tray of each snow glider, said grip plates of one snow glider being designed as foot holders for a person sitting on an snow glider located behind said one snow glider.
